

## Members

The society consists of sponsors and members of the scientific community. Scientific members are graduates of philosophy, engineering or natural sciences, computer technology, mathematics or similar fields. They are interested in scientific, societal, educational, artistic and culturally related questions and problems pertaining to the intertwined areas of philosophy, technology and natural sciences. Sponsoring members are natural and legal persons, who support the society either idealistically or through their contributions. The membership fee for scientific members is 12 €per annum and 24 €per annum for sponsoring members.

If you would like to participate or support APHIN, then please send an e-mail to the following address and you will immediately receive a membership form:

## Propaedeutic

**E**ngineers and Natural Scientists have a closely interlinked chain- like relationship, in which humans, society and nature form further links on the chain. The developments in these areas of ars humana influence each individual link as well as the chain as a whole. Therefore, they form a key problem of theoretical and practical philosophy, because humans, society and nature have always been the focus of philosophical studies. Philosophy critically accompanies these scientific fields and enables their consolidation. Philosophy, engineering and natural sciences have the innate ability to fuse with one another. With regard to the human, socio- and ecological problems of the 21<sup>st</sup> century, cross field cooperation among these key areas is crucial. Such cooperation requires a willingness to change perspectives and openness to the questions and problems posed by each respective field. APHIN e.V. is based on such principles of openness.

## Motto of APHIN e.V.

Engineering and Natural Sciences without Philosophy are blind. Philosophy without Engineering and Natural Science is lacking.

## The Aims of APHIN e.V.

**T**he research and educational aims of the society are:

- The scientific examination of contemporary and historical questions and problems in the interdisciplinary fields of philosophy, engineering, and natural sciences.
- To facilitate events, working groups, seminars and conferences.
- To support students of philosophy from engineering, science, mathematics and computer science backgrounds et. al.
- Clarification of the significance of philosophy for engineering and natural sciences as well as the significance of engineering and natural sciences for humans, society, and nature.
- Scientific, educational, cultural, and art- orientated research in the interdisciplinary fields of philosophy, engineering, and natural sciences.
- To take public relations measures through on- and offline media.
- To support and advise educational institutions (schools and universities) on the establishment and implementation of philosophical and interdisciplinary methods in teaching.
